Profile Summary

Results-driven **Data Analyst** with **5+ years** of experience in data analysis, reporting automation, and dashboard development using **Excel, SQL, Python, Power BI, and Power Apps**. Skilled in building end-to-end reporting pipelines, extracting data from portals, ensuring data quality, and transforming complex datasets into actionable business insights. Experienced in developing dashboards, automating operational workflows, and supporting stakeholders with clear, data-driven decision support. Known for delivering practical analytics solutions that improve visibility, efficiency, and business outcomes.

Professional Experience

Einsteins Square | Data Analyst

Tallinn, Harjumaa (Remote) | 11/2021 – Present

- Generated and automated daily, weekly, and monthly performance reports covering class performance, teacher performance, and sales trends for an online learning platform.
- Analyzed peak selling times and high-performing classes to support operational and scheduling decisions.
- Designed and implemented an Excel-based payout calculation tool, consolidating data from multiple reports and reducing processing time from 8–9 hours to ~3 hours.
- Built Power BI dashboards to monitor live business performance using interactive visuals, KPIs, and trend analysis.
- Extracted and transformed data using SQL from the online portal to support reporting and analysis needs.
- Collaborated with operations teams by scheduling classes based on data-driven insights to improve efficiency and utilization.

Prism Enterprises Pvt. Ltd. | Data Analyst

Mumbai | 10/2020 – 11/2021

- Delivered daily, weekly, and monthly operational reports for a manufacturing organization, supporting management and client decision-making.
- Automated Excel reporting workflows using VBA, reducing daily reporting time by 5–6 hours and cutting individual report generation from 1 hour to ~15 minutes.
- Managed and maintained master datasets, ensuring data accuracy, consistency, and high data integrity across reporting systems.
- Designed and deployed Power BI dashboards to visualize product performance, track product positioning, and highlight key business metrics.
- Conducted deep-dive data analysis to identify trends, inefficiencies, and opportunities, supporting both internal operations and external client requirements.

Innodatatics | Data Analyst Intern

Mumbai | 08/2020 - 10/2020

- Developed a **machine learning model to predict revolving loan amounts**, supporting data-driven financial planning and risk assessment.
- Analyzed **customer payment histories** to identify patterns and segment customers into distinct behavioral groups.
- Created **data visualizations and analytical reports** to translate complex findings into clear insights for business stakeholders, aiding strategic decision-making.

Qualifications

- **B.S. Programming and Data Science** (Expected April 2026) – IIT Madras
- **B.Sc. Programming and Data Science** (Dec 2025) – IIT Madras |
- **Diploma in Data Science** (May 2024) – IIT Madras | CGPA: 7.3
- **Diploma in Programming** (May 2024) – IIT Madras | CGPA: 6.78
- **B.Sc. (Computer Science & Statistics)** – MGKVP, Varanasi (2nd Year, Dropped Midway)
- **HSC (Science)** – Uttar Pradesh State Board, March 2015 | 78%
- **SSC** – Bihar State Board, March 2012 | 77.80%

Skills

Technical Skills

- **Data Analysis & Reporting**
- **Data Cleaning & Data Validation**
- **Data Visualization & Dashboarding**
- **Statistical Analysis**
- **Machine Learning (Supervised Learning, Regression)**
- **Exploratory Data Analysis (EDA)**
- **Business & Performance Metrics Analysis**

Software / Tools

- **Python** (Pandas, NumPy, Matplotlib)
- **SQL** (Data Extraction, Joins, Subqueries)
- **Power BI** (Interactive Dashboards)
- **Excel** (Advanced Formulas, Pivot Tables, VBA Automation)
- **Tableau**
- **Jira**

Languages

- **Python**
- **SQL**

Soft Skills

- **Critical Thinking**
- **Problem Solving**
- **Analytical Mindset**
- **Stakeholder Communication**

Certifications

- **Minor in Economics and Finance** – IIT Madras – 2026
- **Implementing Machine Learning Techniques using NumPy** – IIT Madras – 2025
- **Python for Data Science, AI & Development** – 2024
- **SQL and Relational Databases** – Cognitive Class – 2020

Key Projects

BDM Capstone Project

Business Analysis & Data Analytics Project – Medical Retail

- Conducted an end-to-end **business diagnostics project** for a local medical shop (Wellness Chemist, Pune) facing **below-average revenue performance**.
- Collaborated directly with business stakeholders to understand operations, challenges, and competitive landscape, including competition from **online medical stores**.

- Collected and analysed **one year of sales, inventory, margin, and expiry data**, sourced from Tally records and manual stock registers.
- Performed **data cleaning, preprocessing, and exploratory analysis** using Excel and pivot tables to evaluate product-wise sales, profit margins, and inventory efficiency.
- Identified **top-selling medicines, high-margin products, peak revenue periods, and stock expiry trends**, highlighting key revenue drivers and loss areas.
- Analysed the relationship between **quantity sold, profit margins, and overall profitability** to support pricing and product-mix decisions.
- Delivered **actionable recommendations** on inventory optimization, expiry reduction, product prioritization, pricing strategy, and customer retention (loyalty programs).
- Presented insights through **visual dashboards and charts**, enabling stakeholders to make data-driven decisions to improve revenue and operational efficiency.

Online Grocery Store

Web app | Academic Project

- Designed and developed a **multi-user online grocery store application** using **Python, SQL (SQLite), HTML, and CSS**.
- Implemented **role-based access control** with separate dashboards and functionalities for **users and managers**.
- Built a **SQLite database** to manage users, products, orders, and inventory with secure data handling.
- Developed manager functionalities to **add, update, delete products**, manage inventory levels, and **block or remove users**.
- Enabled users to **register, log in, browse products, place orders, and track previous purchase history**.
- Implemented **real-time inventory status**, displaying products as *Out of Stock* when quantity reaches zero.
- Ensured smooth interaction between frontend and backend through structured SQL queries and backend logic.

Software Engineering Project

AI-Enabled Learning Platform | Academic Group Project

- Designed and developed a **student-focused learning application** aimed at improving existing study platforms by adding features aligned with real student needs.
- Built the application backend using **Python and Flask**, implementing core functionalities and user workflows.
- Integrated an **AI-powered chatbot** using a free API, customized to support students with course-related guidance and learning assistance.
- Engineered **prompt restrictions and guardrails** to ensure the chatbot **does not provide direct answers to assignment questions**, maintaining academic integrity.
- Trained and configured the chatbot to respond **only based on course content and provided documents**, ensuring controlled and relevant outputs.
- Implemented features enabling the chatbot to **summarize lecture videos**, explain concepts, and guide students on **problem-solving approaches** rather than final answers.
- Managed project planning, task allocation, and delivery timelines using **Jira**, following structured software development practices.

Predict Food Ratings

Machine Learning | Kaggle Academic Project

- Worked on a **Kaggle-based machine learning problem** to predict food item ratings using a real-world, **unstructured and noisy dataset**.
- Performed **data cleaning and preprocessing**, including handling missing values, correcting data inconsistencies, and restructuring features for analysis.
- Conducted **feature selection and exploratory data analysis (EDA)** to identify meaningful variables

impacting food ratings.

- Applied **One-Hot Encoding** to categorical variables and prepared datasets using **train-test splitting**.
- Trained and evaluated **multiple machines learning models**, comparing performance to identify the best-performing approaches.
- Performed **model tuning and optimization** to improve prediction accuracy and meet the required benchmark for Kaggle submission acceptance.
- Selected and presented the **top three performing models** based on evaluation metrics, demonstrating comparative model analysis and performance validation.

Mental Wellness App

Design Thinking for Data-Driven App Development | Market Research Project

- Collaborated in a **4-member team** to design a data-driven application focused on **mental health and wellness technology**.
- Conducted **user research and interviews** with the target audience (students and working interns) to identify real-world mental health challenges and unmet needs.
- Synthesized interview insights to define **problem statements, user personas, and solution requirements**.
- Created the **initial product concept and wireframes**, documenting ideas and research findings using **MURAL**.
- Managed project milestones, tasks, and progress tracking using **Jira**, ensuring structured collaboration and timely delivery.
- Designed and iterated **interactive prototypes in Figma**, incorporating feedback collected from potential users during market validation.
- Delivered a **refined final prototype and supporting documentation**, demonstrating an iterative, user-centred design process.

Strategies for Professional Growth

Communication & Listening Skills | Academic Group Project

- Collaborated in a **cross-functional team** to research **communication and active listening skills** as critical enablers of professional growth.
- Conducted **primary research through interviews with senior industry professionals** across data science, AI, software development, and leadership roles.
- **Personally interviewed a Co-Founder & Tech Head at an AI innovation firm (4+ year's experience)**, capturing leadership perspectives on communication, listening, and team effectiveness.
- Analyzed insights from **books, research papers, TED talks, podcasts, and articles**, combining academic and industry viewpoints.
- Defined project scope covering **effective communication, emotional intelligence, conflict resolution, non-verbal cues, and leadership communication**.
- Managed project timelines and deliverables using **Jira**, following a structured WBS approach.
- Recorded, documented, and synthesized interview findings into **actionable recommendations**, presented through detailed reports and video submissions.

Achievements

- District-level scholarship exam awardee
- State-level science exhibition participant
- Winner – District-level debate competition
- Participant – SPIC MACAY cultural program

Personal Information:

- **Languages:** English, Hindi
- **Location:** Pune
